# Test Your Bike Safety Knowledge

Take the quiz below to test your bike safety skills. Circle "T" for true and "F" for false. When you are finished, compare your answers to the ones in the key.

T F 1. Always ride on the left side of the street so you can see the cars coming toward you.

T F 2. You don't need to lock your bike if you can see it at all times.

T F 3. Your right hand brake stops the rear wheel.

T F 4. Your left hand brake stops the front wheel.

T F 5. It is a good idea to ride your bicycle while wearing headphones.

T F 6. If you must stop quickly, squeeze both brakes at the same time.

T F 7. High gear is used for going uphill.

T F 8. When riding your bike you must stop at a stop sign even if there isn't anyone around.

T F 9. When crossing a sidewalk on a bike you must always yield the right-of-way to pedestrians.

T F 10. It's harder for drivers to see you on a bike than it is for you to see them.

T F 11. If drivers look your direction, they always see you.

T F 12. You need to wear a helmet only when you are going to ride near cars.

T F 13. It's a good idea to slow down when riding on wet pavement.

T F 14. It is okay to have a friend ride on your handlebars if you are going slow.

T F 15. When crossing an intersection, you should walk your bike to the other side.

Goose Neck, Frame, Brakes, Seat (Saddle), Handlebar, Brake Pads, Brake Pads, Tire, Reflector, Forks, Rear Wheel, Front Wheel, Axle, Chain, Pedal, Crank, Spoke
Did you know the first bicycles built in 1839 were made of wood? Look at the picture to learn all of the parts on your bike.

Answer Key: 1-F (you should ride in the same direction as traffic), 2-F, 3-T, 4-T, 5-F, 6-T, 7-F, 8-T, 9-T, 10-T, 11-F, 12-F, 13-T, 14-F, 15-T

Spot the Dangers

There are at least 10 dangerous things happening in this picture. Can you find them?
